

RAMZI TEBER

CyberSecurity Engineer

@ teberramzi@gmail.com +216 52207714 Tunis, Tunisia www.linkedin.com/in/ramzi-teber

EXPERIENCE

Software Developer

KARMA Solution

July 2023 – February 2025 Montplaisir, Tunisia

- Designed and developed web applications using a client-server architecture (**Angular / PHP**), ensuring reliable and consistent management of business data flows.
- Developed backend logic in **PHP** with modular structure and separation of concerns, ensuring system maintainability and scalability.
- Refactored legacy **Angular** components by integrating **NgRx** for state management, improving interface scalability and responsiveness.
- Corrective and evolutionary maintenance of an existing system: incident diagnosis and resolution with version control via **Git** and **GitHub**.

PROJECTS

AI-Powered Intelligent SOC

- Designed a SOC combining **Wazuh SIEM**, a **Machine Learning** module (alert classification) and automated response playbooks.
- Tools: Wazuh, Python, Scikit-learn, Dashboard.

LLM Chatbot (Generative AI)

- Designed a conversational assistant powered by LLM models executed via the Groq API for fast and contextualized responses.
- Tools: Python, Streamlit, Groq, LangChain.

Active Directory Hardening

- Secured an **Active Directory** environment (+50 users): hardening GPOs, password policies, privileged account auditing.
- Tools: Windows Server, AD DS, GPO, PowerShell.

CentOS Automation with Ansible

- Ansible playbooks to automate the installation and **hardening** of Linux servers: **user** management, firewall configuration, service deployment.
- Tools: Ansible, YAML, Linux (CentOS), Git.

SUMMARY

“Cybersecurity engineering student with experience in systems administration, secure automation and network security”

EDUCATION

Engineering Degree – IT Systems Security & Networks

TEK-UP

September 2024 – Present

Bachelor’s Degree in IT Systems Engineering

Faculty of Sciences of Tunis

September 2020 – July 2023

SKILLS

Security & Networks

Wazuh

Wireshark

Nmap

firewalld

Active Directory

GPO

Systems

& Automation

Linux

KaliLinux

Windows Server

Ansible

Docker

Git

CI/CD

Development

PHP

Angular

Python
